GREATER MEDIA PURCHASES DIGITAL CONSOLES AND ROUTING NETWORK FROM KLOTZ DIGITAL

ATLANTA, GEORGIA - May 2002 - KLOTZ DIGITAL AMERICA, INC. was awarded a contract by Greater Media Inc. The announcement was made by Mr. Chris Crump, Director of Sales and Marketing for KLOTZ DIGITAL America, Inc. and Milford K. Smith, Vice President Radio Engineering, Greater Media, Inc.

KLOTZ DIGITAL will supply Greater Detroit Radio Group with the KLOTZ DIGITAL VADIS Audio/Media Platform. Greater Media purchased 23 VADIS 880s and eleven VADIS D.C.II Digital Audio Broadcasting Consoles for its new Detroit facility scheduled for completion in Q1 of 2003. The new facility will house 11 on-air, news and production studios for stations WRIF, WMGC and WCSX. The KLOTZ DIGITAL VADIS Platform will also provide central routing and signal distribution via its fiber optic network. Intercom, logic, and remote control functions are supported under the central control of KLOTZ DIGITAL's facility management software. "There is no other system on the market that provides this high level of integration for radio broadcast facilities," said Crump.

Founded in 1956, Greater Media Inc., headquartered in East Brunswick, NJ, owns and operates the nation's third-largest privately held group of radio stations, in terms of audience size. The group includes 18 stations in Boston, Detroit, Philadelphia and New Jersey. "What impressed us most about the KLOTZ DIGITAL system was its network-like routing ability for both the audio and data components of our operation. The system flexibility and scalability are unparalleled," said Smith.

###

KLOTZ DIGITAL is the world leader in Audio/Media platform technology, with its VADIS Audio/Media network, a variety of digital audio mixing consoles and VARIZONE, a Digital Public Address System.
