## **AUSTRALIA : NEW INSTALLATIONS OF KLOTZ DIGITAL'S VADIS AUDIO PLATFORM**

**Sydney, 9 September 2003** – KLOTZ DIGITAL Australia today announces the award of several new contracts:

### **VADIS INSTALLATION NO.4 & 5 FOR DMG BY KLOTZ DIGITAL AUSTRALIA**

KLOTZ DIGITAL is on the verge of setting up installations four and five for DMG Radio. After three very successful installations for DMG's capital city radio stations in Sydney, Melbourne and Perth, DMG are continuing their national VADIS rollout with the first of their regional stations in Nambour and Gosford.

“The flexibility of the VADIS platform has allowed us to realise a very cost-effective system design for our smaller regional stations that integrates seamlessly with the rest of our network” says Adrian Harper, DMG's Technology Development Engineer.

The experienced team at KLOTZ DIGITAL Australia continues to provide innovative solutions for commercial and government clients throughout Australia. DMG Nambour will be completed in September followed by the Gosford installation.

### **KLOTZ DIGITAL AUSTRALIA SECURES CONTRACT FROM AUSTEREO PERTH**

Austereo continue the digitisation of the national network with the purchase of their second VADIS system for MIXFM and 92.9FM in Perth. The installation, due for completion later this year, will be KLOTZ DIGITAL Australia's largest commercial installation to date.

The innovative system design created by Austereo's engineers in conjunction with the project team of KLOTZ DIGITAL Australia provides a level of network integration, reliability and flexibility not possible with any other audio platform.

The KLOTZ DIGITAL installation provides five On Air studios, two News booths and a news preparation area utilising KLOTZ DIGITAL's latest touch screen virtual control surfaces, all fully integrated via a central automated MCR system. The solution also incorporates a VARIZONE digital house monitoring system throughout the facility.

Austereo began its digitisation program with the first VADIS installation in Brisbane's 4MMM and B105 three years ago.

###

KLOTZ DIGITAL is the world leader in Audio/Media platform technology, with its VADIS™ Audio/Media network, a variety of digital audio mixing consoles and VARIZONE, a Digital Public Address System. KLOTZ DIGITAL is based in Munich, Germany, with subsidiary operations in the United States, Malaysia, and Australia.
