KLOTZ DIGITAL ANNOUNCES GREAT SUCCESSES IN ITS ASIA PACIFIC SUBSIDIARIES

Sydney, June 2008 – KLOTZ DIGITAL Australia has announced to have won the tender for the rebuild of Austereo Melbourne. KLOTZ DIGITAL Australia will provide VADIS D.C.II mixing consoles, VADIS 888 frames for all on-air studios, pre-production studios and all news booths. In addition to this KLOTZ DIGITAL Australia will also provide all signal routing for the Main Control Room (MCR) and a VARIZONE digital Public Address System. “We are honoured to have been chosen again by Austereo and are looking forward to be involved in this exciting project. Through the close work between the Austereo engineers and our staff, I believe that we have come up with a system design which will set the standard for a long time to come” says Patrick Salloch. In addition to winning this prestige contract, KLOTZ DIGITAL Australia has also announced the winning of the ABC Melbourne tender late in 2007, which will see the Australian branch deliver and configure 16 on-air studios for the ABC between now and the end of 2008. “Winning both of these fantastic jobs is not only a great success for us, but it also sends a clear message to the rest of the industry that we are still the leaders in our field and our customers are satisfied not only with our products and services but also trust in our local staff and our commitment to the region. A lot of manufacturers have been trying to copy what KLOTZ DIGITAL has done over the years, but none of them have shown the commitment to the Australian market and committed as many resources as we have done and will continue to do,” continues Salloch.

###

KLOTZ DIGITAL AG of Munich, Germany is the world leader in AudioMedia Platform Technology.
